SPECIALLY DESIGNED WATER HEATER, CATERING TO EXTENSIVE SANITARY HOT WATER NEEDS

Public spaces: function rooms,
restaurants, fitness centres Industry...

ELECTRIC WATER HEATER

Model 500
(Floor-standing)

Comfort

- All-in-one product intended for continuous use, catering to extensive sanitary hot water needs with a temperature setting of 80°C
- The cover control knob to set the temperature
- Cover thermometer

Durability

- V40 = 923 L (80°C)
- Stainless steel direct immersion heating element
- Anti-corrosive protection via magnesium anode
- All-current connection
- 80°C temperature setting
- Impact-resistant, flexible PVC insulation jacket

Installation

- Quick installation of an all-in-one product intended for continuous professional use
- Easy maintenance (easily change the magnesium anode without draining the water heater)
- Adjustable feet

Peace of mind

- Impact-resistant, flexible PVC insulation jacket
- 5-year warranty (tank)
- 2-year warranty (parts)

User-friendly

- Dedicated services for professionals: Technical Support, Technical After-Sales Customer Service

- 1 ENAMELLED STEEL TANK
- 2 STAINLESS STEEL HEATING ELEMENT
- 3 MAGNESIUM ANODE
- 4 Hot water outlet pipe
- 5 Finger probe
- 6 Inlet diffuser
- 7 HIGH-DENSITY polyurethane foam 0% CFC
- 8 Flexible PVC jacket
- 9 Temperature control knob
- 10 Thermometer

Technical specifications

Model	Ref.	Output (W)	Voltage (V)	Heat-up time ¹	Amount of hot water at 40°C ²	Cooling constant ³
500	896998	5000	380-415/220-240	5 hrs, 53 mins	923	2.72

1. Actual heat-up time between 15° and 65°C.

2. Amount of mixed hot water at 40°C produced by the appliance set at 80°C.

3. Service consumption and cooling constant from normative tests at 65°C.
